SUMMARY

First-year SMK student in Computer Network Engineering (TKJ) in Indonesia. I build small web tools that I can finish and keep public, and I care about interfaces that stay fast, accessible, and usable when JavaScript or a third-party API is unavailable.

PROJECTS

Code to Snippet

Browser tool · GitHub Pages

Converts plain code into a VS Code snippet file without a build step, a server, or a dependency.

- Escaping layer keeps $, backslashes, and real tab stops intact, so jQuery, PHP, and template literals survive the round trip.
- Optional placeholder support ($1, ${1:name}, ${1|a,b|}), syntax-highlighted output, line numbers, copy and download, keyboard shortcuts.
- Everything runs in the tab: pasted code never leaves the browser.

HTML · CSS · JavaScript · Clipboard API · File API Live · Source

This Portfolio

Site · Vercel

Design and front end for the site this CV lives on, built as one public repository.

- Next.js App Router with a typography-first layout, a light and dark theme, and keyboard-accessible navigation.
- WebGL hero built with React Three Fiber: loaded after the text, paused off-screen, and backed by an SVG fallback when JavaScript is unavailable.
- Repository and contribution data comes from the GitHub API, cached hourly; Lighthouse scores 100 for accessibility, best practices, and SEO.

TypeScript · Next.js · React Three Fiber · Tailwind CSS Live · Source

SKILLS

Languages and frontend	JavaScript · TypeScript · React · Next.js · Tailwind CSS · HTML5 · CSS3 · Markdown
Backend and tools	Node.js · MongoDB · Git · GitHub · npm
Design and hosting	Figma · Canva · Vercel · GitHub Pages

EDUCATION

SMK — Computer Network Engineering (TKJ)

Indonesia · First year

Networking coursework at school; web development through documentation, small builds, and public repositories.
